

Business Intelligence (BI) Developer

PaySimple, voted one of the best places to work in Denver in both 2008 and 2009, is staffing up to support explosive growth 2012! We are looking for a superstar BI Developer to become an integral member of our team.

Job Description:

The BI Developer will be responsible for the design and development of all reports and reporting mechanisms supported by PaySimple systems. This will include both transactional and BI analytical reports based upon Microsoft Reporting technologies, and will be through multiple channels including SSRS and C# developed Data-Access Layers. This person must have solid experience developing mechanisms for delivery of reports online via browsers as well as via desktop applications, and be fluent in the challenges of working with multiple back-end data-stores simultaneously.

Responsibilities:

- Work with the Enterprise Architect and CTO to formulate the next generation transactional and analytical reporting strategy for use in both in-house and client facing applications delivered via multiple web-based applications
- Work within a multi-disciplined team to design and develop transactional and analytical reports for delivery via the organization's SaaS product and service offerings
- Work with inter-departmental leads to identify business data warehousing and reporting needs, and develop the business intelligence reports necessary to support the organization's broader BI initiatives
- Work within a multi-disciplined team to develop the C#-based Data Access Layer components necessary to support the BI strategy, while maintaining consistency with architectural best practices and security constructs
- Drive innovation within team and company

Qualifications:

- 5+ years experience and strong knowledge of Microsoft SQL Server 2005 & 2008
- 5+ years experience and strong knowledge of SSRS/SSIS/SSAS 2005 & 2008 and T-SQL
- 3+ years experience using MDX, XQuery, XMLA Queries, and Service Broker
- 3+ years experience in ReportViewer Development (RDLC | server- & client-side modes)
- 3+ years experience in C# / Visual Studio Development
- A background in Transaction Processing and/or Payment Systems is a huge plus
- Experience with PCI Compliance preferred
- MS/BS in Computer Science or related field preferred, or sufficient comparable experience
- Strong work ethic and ability to work independently, as well as in an Agile development environment
