

Development Lead, Software Development

PaySimple, voted one of the best places to work in Denver in both 2008 and 2009, is staffing up to support explosive growth in 2011/2012! We are looking for a superstar Development Lead, Software Development to become an integral member of our team.

Job Description:

PaySimple is seeking a Development Lead, Software Development to drive its software development process, maintaining all aspects of the overall software development lifecycle and ensuring the on-time, quality delivery of software product releases. This role is a 50% management, 50% development position, and will require the successful candidate to be responsible for individual coding contributions. The role will work side-by-side with a team of existing, seasoned engineers at PaySimple.

Responsibilities:

- Lead the execution of the development pipeline and delivery of the organization's software products to QA, and ultimately Production
- Manage the day-to-day activities of the development team(s) and ensuring the coordination of individual team deliverables is synchronized as necessary to achieve product releases
- Manage execution of the Product Versioning strategy across all teams as part of the development lifecycle
- Work with the Enterprise Architect, CTO, and Program Management to sequence/coordinate development activities within an Agile/Iterative-style development environment
- Ensure that best practices for coding, architecture, and security are employed across all teams consistently, and maintain responsibility for the quality development of internal and external applications
- Manage timelines, budgets, and resources (internal and external) within the PaySimple software development lifecycle
- Provide hands-on development and mentoring as necessary for other members of the development team
- Implement systems based on well defined SLAs

Qualifications:

- Experience leading and managing small to medium-sized development teams of between 10 and 25 developers
- Proficient building browser-based applications based upon Microsoft technologies, specifically utilizing Visual Studio and C#
- Experience developing applications with heavy use of JavaScript/AJAX
- Proficient with HTML4 and CSS2, with working knowledge of HTML5 and CSS3
- Strong experience developing/managing REST and SOAP-based Web Service API(s) in a transaction processing environment
- Strong understanding of web vulnerability mitigation techniques and industry best practices
- Minimum 7+ years development experience, 3+ years team lead experience
