

.NET Developer

PaySimple, voted one of the best places to work in Denver in both 2008 and 2009, is staffing up to support explosive growth in 2011/2012! We are looking for a superstar .NET Developer to become an integral member of our team.

Job Description:

PaySimple is looking for a Mid to Senior Level .NET Developer, who will help us expand and maintain a WCF-based Payment and Invoicing Services Gateway written using a combination of C#, .NET, ADO, nHibernate, and SQL. This position will be a key member of the Gateway Services team, and will share design, development, and support responsibilities within the team in the delivery of Gateway Services in a high-volume, transaction processing environment.

Responsibilities:

- Proficient in developing new software using state-of-the-art languages and tools
- Work within a SaaS environment
- Drive innovation within team and company
- Contribute to overall architecture and design, working closely with the lead architect
- Hands on development, plus contributing to the overall software life cycle including participating in code reviews, setting coding standards and introducing new technologies to the team
- Work with Quality Assurance and developers to ensure software builds meet system, functional and performance requirements and adhere to corporate policies such as security and privacy
- Participate in the design and planning of enhancements to existing products and development of new products
- Strong work ethic and ability to work independently, as well as in an Agile development environment

Qualifications:

- 5+ years experience developing web-based, n-tiered systems in a .NET/SQL Server environment (C# required)
- Must have experience with .NET 3.5 & 4.0 and ADO.NET
- Solid understanding and experience with software installation, configuration and troubleshooting processes
- Understanding of the release management and software development lifecycles
- Strong skills and knowledge of relational database design and development using Microsoft SQL Server 2005 & 2008
- Must have a solid understanding of Services-Oriented Architecture and Distributed Architectures
- Experience with Windows Communication Foundation (WCF) , AppFabric, and/or nHibernate a strong plus.
- A background in Transaction Processing and/or Payment Systems is a strong plus
- Experience with PCI Compliance preferred
- MS/BS in Computer Science or related field preferred, or sufficient comparable experience
